ANESTHESIOLOGY
Volume 1

INDEX TO SUBJECTS

Items having **boldface figures** indicate titled subjects of articles

"A–C–R," 16
Abdominal surgery, cyclopropane and regional anesthesia, 26
Acidosis, respiratory, role in convulsions, **56**
Adrenalin (see Epinephrine)
Adrianol (see Neosynephrine)
Age, factor in choice of anesthetic, 150, 151
Alcohol, ethyl, fate in body, 316
Alcohol-chloroform-ether mixture, effect on liver, 42
Alkali reserve, loss during anesthesia, 52
Amylene hydrate, fate in body, 316
Anemia, factor in use of barbiturates, 51
Anesthesia,
  balanced, 51, 52
  block, with cyclopropane, 27
  control of body temperature during, **208**
  effect on kidney, 47
  effect on prothrombin, **89**
  high spinal, 294
  historical aspects, 5
  hyperthermia following, **208**
  infiltration with piperidine derivatives, 308
  intradermal with piperidine derivatives, 308
  intratracheal,
    contraindications, 220
    for tonsillectomy, **216**
    technic, 218
    value in relaxation, 296
  intravenous, **145**
    preanesthetic medication, 146
    with local anesthesia, 152
    with spinal anesthesia, 152
    with topical anesthesia, 150
  local,
    duration, **205**
    effect on prothrombin, 92
    with pentothal sodium, 152
  peridural,
    technic, 28
    with cyclopropane, 27
  regional,
    with cyclopropane, **26**
    with pentothal, nitrous oxide-oxygen, 152
  reversal, 23, 29
  sciatic nerve block, with piperidine derivatives, 308
  spinal,
    blood flow during, **82**
    effect on kidney, 47
    effect on prothrombin, 93
    inconsistencies, 280
    oxygen administration during, 51, 198
    table of dosage, site of injection, etc., 28
    total block, **280**
    with cyclopropane, 27
    with pentothal sodium, 152
    with pentothal, nitrous oxide-oxygen, 152
    with piperidine derivatives, 307
  subarachnoid (see Anesthesia, spinal)
  surface, with piperidine derivatives, 305
  theories of, 122
Anesthetics,
  effect on water exchange, **121**
  fate in the body, 122, 213, 320
  local, properties of ephedrine hydrochloride, **69**
  use of epinephrine in, 327
Anesthetists,
  place in American medicine, **1**
  program of preparedness, 341
  responsibility of, **136**
  value of public regard, 1
Anoxemia,
  acute, 188
  anemic, 188
  chronic, 188
  effect on blood sugar, 43
  effect on kidney, 46, 52
  effect on liver, 42, 43, 45
  histotoxic, 188
  stagnant, 188
Aphonia, treatment with pentothal sodium, **94**
Apnea, 13
  during cyclopropane anesthesia, 14
Apparatus,
  explosibility indicator, 37
  for adding air to anesthetic mixtures, 34
  for administration of oxygen, 190, 192, 199, 201, 202, 203
Arrhythmia (see Heart)
Arterenol, 335
Arteriosclerosis, circulation time, 85
Asphyxia (see also Anoxemia)
  anesthetic, 198
  due to increased intracranial pressure, 200
  during tonsillectomy, 216
  emergency treatment of, 198
  livida, 200
  neonatorum, 200
  pallida, 200
  symptoms, 197

Atelectasis (see Complications)
Atropine sulfate,
  effect on gastric motility, 303
  effect on intestinal motility, 303
  effect on kidney, 47
  fate in body, 320
  value before intravenous anesthesia, 146
Avertin (see Tribromethanol)

Balanced anesthesia (see Anesthesia, balanced)
Barbital,
  effect on kidney, 50
  effect on liver, 45
Barbiturates,
  action during exposure to cold test, 134
  effect on blood concentration, 131
  effect on water exchange, 130
  fate in body, 318
  in diabetic patients, 46
  intravenously,
    before cyclopropane, 19
    preanesthetic medication for, 146
  overdose, oxygen therapy for, 198
  use in minimizing arrhythmias, 19
Beta-2-(N-ethylpiperidyl) ethylbenzoate Hydrochloride, anesthetic potency of, 306
Beta-2-piperidyl-ethylmetaaminobenzoate Hydrochloride, anesthetic potency of, 306
Beta-2-piperidyl-ethylorthoaminobenzoate Hydrochloride, anesthetic potency of, 306
Beta-2-piperidyl-ethylparaaminobenzoate Hydrochloride, anesthetic potency of, 306
Beta-2-piperidyl-ethylphenylurethane Hydrochloride, anesthetic potency of, 306
Blood,
  concentration, effect of anesthetics, 131
  effects of ether, 128
  effect of sodium amytal, 130
  flow during spinal anesthesia, **82**
  oxygen, during vinethene anesthesia, 249
  pressure,
    during vinethene anesthesia, 249
    effect of evipal soluble, 154
    effect of piperidine derivatives, 310
    effect on blood flow, 86
    role in producing tachycardia, 165
  role in detoxification of evipal, 156
  sugar,
    effect of chloroform, 43
    in determination of liver damage, 46
Bradycardia (see Heart)
Brain,
  changes following nitrous oxide, 271
  role in detoxification of evipal soluble, 156
Bromal, fate in body, 317
Bromine, fate in body, 317
Bronchial aspiration (see Tracheo-bronchial aspiration)
Bronchopneumonia, **136**

Caffeine, fate in body, 321
Camphor, fate in body, 321
Carbon dioxide,
  during cyclopropane anesthesia, 14
  during oxygen lack, 142
  effect during total spinal block, 289
  effect on explosibility of gases, 32
  postoperative use of, 22, 144
  pure, 144
  role in convulsions, 58, 65, 66
Carbon dioxide absorption, technic, 37
Children,
  anesthesia for tonsillectomy, 217
  contraindication to barbiturates intravenously, 150
Chloral hydrate, fate in body, 317
Chloralose, action during cold test, 134
Chloroform,
  effect on heart, 42, 158
  effect on kidney, 42, 47, 48, 49
  effect on liver, 40
  effect on pancreas, 42
  effect on placenta, 42
  fate in body, 317
  poisoning, treatment, 50
  value of oxygen administration with, 42
Choice of anesthetic, 50, 51, 52, 53
Circulation,
  "arteriolar-capillary-refill-time," 15
  effect of spinal anesthesia, 82
Cobefrin (desoxy-norephedrine), 336
  during vinethene anesthesia, 247
Cocaine, fate in body, 319
Codeine, fate in body, 320
Cold, effect on water exchange, 132
Colloid theory of anesthesia, 123
Complications,
  after cyclopropane anesthesia, 278
  after tonsillectomy, 221
  pulmonary, **136**, 296
    management, 143
    tracheobronchial aspiration, **72**, 144
  psychic factors contributing to, 140
Controlled respiration, **13**
Convulsions,
  carbon dioxide as probable cause, 15
  during anesthesia, **56**
  experimental study, 58
Coramine, fate in body, 321
Corbasil (see Cobefrin)
Cyclopropane, **13**
  comparison with chloroform, 16
  comparison with ether, 16
  concentrations of, 14, 26, 27
  convulsions during, 62
  effect on kidney, 49
  effect on liver, 44
  explosibility, 31
  fate in body, 315
  oil-water solubility, 17

recovery time following, 23
relaxation with, 293
with regional anesthesia, **26**
sensitization of heart to epinephrine, 158
technic of administration, 13, 20, 26
ventricular fibrillation during,
role of epinephrine, **158**
treatment of, **167**
water exchange during, 133
Cyclopropane-air-oxygen, preliminary report, **31**
Cyclopropane-nitrogen-oxygen, 33
Cyclopropyl methyl ether, **274**
blood pressure during, 278
pulse during, 278
sequelae, 278
technic, 277
Cyprome ether is Cyclopropyl methyl ether

Dehydration theory of anesthesia, 123
Delirium after cyclopropane anesthesia, 23
Detoxification of evipal soluble, 153
Dextrose in chloroform poisoning, 50
Diabetes,
affecting choice of anesthetic, 46
effect of pentothal sodium, 50
Dial, fate in body, 318
Diet,
effect on chloroform poisoning, 42
influence on action of chloroform, 41
value in prevention of liver damage, 44
Divinyl ether (see Vinethene)
Drugs,
anesthetic, fate in body, 312
vasoconstrictor, **323**

Edema, effect of anesthetics, 133
Emergence delirium, 23
Ephedrine, **330**
effect on blood flow, 87
effect on duration of evipal anesthesia, 154
fate in body, 321
local anesthetic properties of, **69**
mode of action, 328
use during spinal anesthesia, 51
Epinephrine, **323**
after procaine, effect on ventricular fibrillation, 170
and procaine simultaneously, effect on ventricular fibrillation, 169
before procaine, effect on ventricular fibrillation, 170
concentration in local anesthetics, **205**
contraindications, 328
during cyclopropane anesthesia, **158**
during vinethene anesthesia, 247
effect on duration of local anesthesia, **205**
effect on kidney function, 46
effect on ventricular fibrillation, **167**
fate in body, 321
site of action, 164
substitutes, in local anesthetic solutions, 337
Epinine, 333
Ether,
cyclopropyl butyl, 274
cyclopropyl ethyl, 274
cyclopropyl methyl, **274**
cyclopropyl propyl, 274
diethyl,
brain water content during, 126
convulsions, 56
effect on body temperature, 208
effect on glycogen in liver, 43
effect on kidney, 47, 48
effect on liver, 42, 45
effect on spleen, 129
explosibility, 31
fate in body, 316
hydrogen ion concentration during, 132
liberation of epinephrine during, 327
pentothal induction before, 52
water exchange during, 131
divinyl (see Vinethene)
Ethylene,
effect on kidney, 49
effect on liver, 42
fate in body, 315
explosibility, 31
Evipal soluble,
detoxification, **153**
effect on blood pressure, 154
fate in body, 318
value in prevention of arrhythmias, 19
Eviscerectomy, effect on recovery from evipal, 155
Explosions, 31

Fibrillation (see Heart)
Fibrinogen, concentration in chloroform poisoning, 41
Fetus, effect of chloroform, 42

Gases,
absorption rate, 142
analysis of mixtures in supply bag, 35
explosibility, 31
flammability, 31
Gastro-intestinal activity,
during vinethene anesthesia, 250
control with novatropine, **300**
Glucose, effect on kidney during anesthesia, 48
Glucose-pontocaine solution, 27

Heart,
arrhythmia, 13, 15
classification of, 17
during cyclopropane anesthesia, 15, 27
value of barbiturates in prevention, 19
block, during cyclopropane anesthesia, 18
bradycardia, during cyclopropane anesthesia, 17
disease, use of oxygen, 195
effects of vinethene, 246

response to adrenalin during cyclopropane anesthesia, 158
tachycardia, during cyclopropane anesthesia, 18, **158**, 165
ventricular fibrillation, 167
Heat,
regulation during anesthesia, **208**
role in production of convulsions, 60, 61
Histamine, during total spinal block, 289
Hydrocarbons, fate in body, 315
Hyperinsulinism, use of ether in treatment, 51
Hyperthermia,
after anesthesia, **208**
role in convulsions, **56**
Hyperventilation, postoperative, 22, **144**
Hypoxia, 18

Insulin, use in chloroform poisoning, 50
Intestine,
during vinethene, 250
effect of novatropine, **300**
Intracaine, 86

Jaundice, anesthesia for patients with, 89

Kidney,
effect of anesthesia, **40**, 48, 49, 133
effect of blood pressure changes, 46
effect of vinethene, 250
role in detoxification of evipal, 156

Larynx, spasm of, 295
Lipoid theory of anesthesia, 122
Liver,
damage,
delayed changes from anesthesia, 51
effect of prolonged anesthesia, 45
disease, use of barbiturates, 50
effect of alcohol-chloroform-ether mixture, 42
effect of anoxemia, 42
effect of barbital, 45
effect of chloroform, 40
effect of cyclopropane, 44
effect of diethyl ether, 42
effect of divinyl ether, 43, 252
effect of ethylene, 42
effect of nitrous oxide, 42
effect of pentobarbital, 45
effect of sodium amytal, 45
effect of tribromethanol, 44
glycogen content of, 42
role in anesthesia, **40**
role in detoxification of evipal soluble, 154, 156
water exchange during sodium amytal, 131

Mental disturbances, after nitrous oxide, **261**
Metasympathol (see Neosynephrine)
Metrazol, fate in body, 320
Meyer-Overton theory of narcosis, 122
Morphine,
addiction, water exchange during, 124
effect during vinethene anesthesia, 248
effect on blood concentration, 131
effect on kidney, 47
fate in body, 320
hydrogen ion concentration, 132
intravenously, 146
value before intravenous anesthesia, 146
Muscle,
activity, water exchange during, 132
effect of vinethene, 250
role in detoxification of evipal soluble, 156
tonus, effect in respiratory obstruction, 140

Nembutal, value before cyclopropane, 19
Neosynephrine, 334
during vinethene anesthesia, 247
Nephritis, affecting choice of anesthetic, 52
Nitrogen, effect on explosibility of gases, 32
Nitrous oxide,
brain changes following, 271
fate in body, 318
effect on explosibility of gases, 32
effect on liver, 42
for tonsillectomy, **216**
mental disturbances after, **261**
Nitrous oxide-oxygen with pentothal, 51
Noradrenaline (see Arterenol)
Novatropine, **300**, 303
Novocain (see Procain)

Oxygen,
effect on explosibility of gases, 31
lack,
effect on circulation, 189
effect on postoperative complications, 142
symptoms, 188
methods of administration, 189
protective action during chloroform anesthesia, 42
role in metabolism, 193
therapy, **187**, 193
concentrations, 194
during spinal anesthesia, 198
in anesthetic asphyxia, 198
in asphyxia neonatorum, 201
in barbiturate overdose, 198
in heart disease, 195
in pneumonia, 194
value with cyclopropane, 44
value with vinethene, 44, 257
with pentothal sodium and nitrous oxide, 51
Oxygen-helium, method of administration, 191

Para-amino benzoic acid, 175
Paraldehyde, fate in body, 316
Paramon (calcium double salt of benzyl succinic and p-amino benzoic acid) 179

Passive respiration, 21
Pentobarbital sodium,
  effect on liver, 45
  fate in body, 319
Pentothal sodium, 145
  contraindications, 149
  fate in body, 319
  induction, 52, 151
  intravenous, dosage, 146
  preanesthetic medication, 146
  special uses, 151
  technic of administration, 147
  treatment of aphonia, **94**
  use for diabetic patients, 50
  value in prevention of arrhythmias, 19
  with local anesthesia, 152
  with oxygen, 51
  with oxygen and nitrous oxide, 51
  with spinal anesthesia, 152
Phenobarbital,
  effect on kidney, 50
  fate in body, 318
Picrotoxin, 321
Piperidine derivatives, anesthetic potency of, **305**
Placenta, effect of chloroform, 42
Pneumonia,
  oxygen therapy, 194
  tracheo-bronchial aspiration, 72
Pontocaine-glucose solution, 27
Pontocaine-procaine mixture, 27
Post pituitary extract, 337
Posture,
  charting, **241**
  during total spinal block, 283
  surgical, **241**
  symbols for recording, 245
Preanesthetic medication, before cyclopropane, 18
Pregnancy,
  effect of chloroform, 42
  kidney function during, 48
Preliminary reports,
  cyclopropane-air-oxygen, **31**
  total spinal block, **280**
Procaine, 27
  after epinephrine, effect on ventricular fibrillation, 170
  and epinephrine simultaneously, effect on ventricular fibrillation, 169
  before epinephrine, effect on ventricular fibrillation, 170
  concentrations, **205**
  duration of anesthesia with, **205**
  effect on prothrombin, 92
  fate in body, 319
  intracardiac injection, 170
  intravenously, 168
  local application to heart, 167
Procaine-pontocaine mixture, 27
Prothrombin, effect of anesthesia, **89**
Psychosis,
  classification of symptoms, 270
  postanesthetic, **261**
  postoperative, 261
Psychotherapy, 94
Pulse, changes during oxygen therapy, 194

Relaxation, **292**
  abdominal, 13, 19, **26**
  with cyclopropyl methyl ether, 277
Respiration,
  effect of cyclopropane, 14
  effect of narcotics, 139
  effect of piperidine derivatives, 310
  nerve supply, 138, 141
Resuscitation, 196
  oxygen therapy, **187**

Scopolamine,
  effect in vinethene anesthesia, 248
  fate in body, 320
Shock,
  during cyclopropane anesthesia, 24
  use of epinephrine, 327
  use of intravenous fluids, 131
Signs of anesthesia,
  during cyclopropane, 23
  during cyclopropane-air-oxygen anesthesia, 34
  during intravenous pentothal sodium, 149
  pupil, 24
  tracheal tug, 15
Soda-lime, efficiency of, 37
Sodium amytal,
  brain water content during, 126
  effect on liver damage, 45
  fate in body, 318
  hydrogen ion concentration after, 132
  spleen during, 130
  water exchange due to, 127
Sodium bicarbonate, effect on kidney, 48
Sodium para-amino benzoate, 181
Spinal anesthesia (see Anesthesia)
Spleen,
  during anesthesia, 129, 130
  role in detoxification of evipal soluble, 156
Stethoscope, precordial application, 15
Stomach, effect of novatropine, **300**
Suction bronchoscopy (see Tracheo-bronchial aspiration)
Sulfanilamide, contraindication to barbiturates intravenously, 151
Suprifene (para-oxy-ephedrine) 336
Sympathol (see Synephrine)
Synephrine, 334

TSB (total spinal block), 281
Tachycardia (see Heart)
Technic,
  acarbic apneic, 296
  apneic, 29
  cyclopropane administration, 20, 26
  Meltzer and Auer, 296

peridural block, 28
Temperature,
derangements during anesthesia, 208
effect on water exchange, 134
Theory of anesthesia, 122
Tonsillectomy,
endotracheal nitrous oxide anesthesia, **216**
hazards, 216
nitrous oxide complications, 221
Total spinal block, preliminary report, **280**
Tracheal tug, 15
Tracheo-bronchial aspiration, **72**, 144
Tribromethanol,
effect on kidney, 49
effect on liver, 44
fate in body, 317
Trichlorethanol, fate in body, 317
Vasoconstrictor drugs, **323**
Veritol, 335
Veronal, fate in body, 318
Vinesthene, vinethene, vinyl ether divinyl, **246**
action on heart, 247
effect on blood oxygen, 249
effect on blood pressure, 249
effect on gastric activity, 250
effect on kidney, 251
effect on liver, 43, 45, 252
effect on muscle activity, 250
fate in body, 317
value of oxygen with, 45
Vitamin K substitute, 89, 92

Water exchange, effect of anesthetics, **121**

ERRATA

July Issue, page 31, line 3, Haas should read Hass.
September Issue, page 152, line 17, "epinephrine" should read ephedrine.

EDITORIAL POLICY

General Information

ANESTHESIOLOGY is owned and published by the American Society of Anesthetists, Inc. It is issued bi-monthly and printed by the Lancaster Press, Inc., at Lancaster, Pennsylvania. Its purpose is to stimulate research and to disseminate knowledge in the field of Anesthesiology. The subject matter consists of original articles, both clinical and experimental; reviews; case reports; abstracts of the current literature, and book reviews. Original articles are accepted for publication with the understanding that they are contributed exclusively to this Journal and become the property of the American Society of Anesthetists, Inc.

Subject matter appearing in ANESTHESIOLOGY is covered by copyright. Permission will be granted upon request for reproduction in outstanding publications if proper credit is given. Reproduction, if for commercial purposes, is not permitted.

Manuscripts for publication, books for review, and correspondence relating to the editorial management should be sent to the Editor, Henry S. Ruth, M.D., 218 Derwen Road, Merion, Pennsylvania. Communications regarding subscriptions, advertising, and reprints should be sent to the Business Editor, Paul M. Wood, M.D., 745 Fifth Avenue, New York City. Subscription rates per annum, in advance, including postage: Domestic, $6.00; Canadian, $6.50; Foreign, $7.00. Single copies of current issue will not be sold; single copies of previous issues as long as available, $1.50. Notice of change of address must be given at least fifteen days prior to the date the change will become effective.

Specifications for Manuscripts

1. Manuscripts must be typewritten, double-spaced, with wide margins, and the original copy submitted.

2. Tables, references, and legends should be on separate sheets.

3. Case histories and protocols should be written in concise, grammatically correct statements or the data may be put in semi-tabular form.

4. Citations to the literature should be numbered serially in the text and the references listed at the end of the paper should appear in corresponding order. Bibliographical listings should be formed according to the Index Medicus published by the American Medical Association. This requires the sequence number, the name of the author and initials, title of article, name of periodical with volume, page, month and year. Example: 6. Jones, F. D.: Anesthesiology: What It Stands For, J. A. M. A. 24: 2019–2040 (Mar. 1) 1940.

5. The paper should be concluded with a summary not exceeding 250 words, intelligible without reference to the main text.

6. The author should keep a carbon copy of the manuscript, as the original will not be returned. The name of the author should appear on each sheet and the author's full name and address must appear on the first sheet of the manuscript.

Specifications for Illustrations

1. Photographs should be unmounted, glossy prints.

2. Drawings and charts for reproduction should be in black india ink on white paper.

3. Graphs should be on white or blue-lined heavy paper, bristolboard, or drawing cloth, and should be arranged to conserve vertical space.

4. Photographs and drawings for illustration must be numbered, the top plainly indicated and an abbreviated title of the paper with the name of the author placed on the back of each. Legends for the illustrations must be typewritten on a separate sheet in a single list with numbers corresponding to those on the photographs or drawings.

5. For safety in shipment, the size of illustrations should not exceed 12 x 18 inches.

6. All material should be packed flat for shipment or mailing. A certain amount of illustrative and tabular material will be allowed without charge. Necessary additional illustrations may be allowed at cost upon approval by the Editor.

7. Galley proofs and engraver's proofs will be sent to the author and to the Editor for correction.

Reprints

A price list and order blank for reprints will be sent with the galley proofs. Order for reprints must be returned with the galley proofs to the Business Editor, otherwise reprints cannot be furnished at these prices.
